

# Boçelik excels in CPS system

**CPS** CELL POCKET SYSTEM

**Boçelik made CPS extends REM sleep period with maximum comfort.**

Functioning as the leading supplier of the biggest mattress and furniture manufacturers of Europe, Boçelik is a respectful brand in new generation springs systems. We spoke with Feridun Tosun, Export Manager of Boçelik, about their success story.

**Which machinery do you use in production of tablet pocket springs? What is your production capacity?**

Boçelik is an industrial leading of tablet products in Turkey and we called CPS (Cell Pocket

Systems). We have and high capacity and efficient machine park of our CPS products. Annual production capacity for CPS unit is approximately 100,000 m .

**What advantages do the mattresses made from tablet pocket springs offer?**

CPS is the ideal supportive spring system that moves independently of each other. Allowing for an additional spring layer, CPS springs have been developed for use on products promising greater comfort and

support. CPS springs are independent and supportive.

CPS provide equal support to every point of the body

The springs are manufactured to maintain their flexibility within the mattress.

CPS springs increase REM sleep time by reducing the pressure inside the mattress.

Boşçelik manufactures different spring diameter and different wire diameter for customer demand.

Because of low height, CPS springs provide perfect combination of all springs.

**This is a quite new product in Turkish market. How good is it welcomed by mattress manufacturers?**

Although using of pocket spring date back to old times, most of mattress producers prefer to use newly. Boşçelik produce CPS products since 2018 and become

ing more and more preferred by customers. We expect that customers who have not included the CPS products in their mattress portfolio yet, will start to use in their beds when they meet the comfort of the CPS in time.

**Can you evaluate the costs when you compare with other spring systems?**

There are many mattress producers use our CPS products in do-

mestic and export market. These mattresses can be provided and tested as well.

**Is there anything that you would like to underline?**

CPS springs not only use in mattress, also can use many different areas such as box spring head, luxury furniture, bus, train and airplane seats, sofa cushions, industrial cushion system, conference, cinema-theatre seats etc.
