

Maxi bonnel can able to produce 150 springs/m² / 364 count*. Size:Full

Maxi bonnel spring system supports the body and provides a more ideal sleeping environment than traditional bonel springs.

Thanks to the higher number of springs in maxi bonnel compared to traditional bonnell springs, more support and more comfort is provided in the mattresses produced.

Maxibonnel springs have a longer lifespan which is produced with high quality Boyçelik steel wire.
